update room number for a patient

The screenshot shows the SQL Developer interface with a query window titled "SQLQuery3.s...deepa (70)". The query contains a SELECT statement to display patient names starting with 'S', followed by an UPDATE statement to change the room number for patient ID 120, and another SELECT statement to display the updated patient.

```
56
57 select * from patients;
58
59 select * from patients where city = 'chennai' or city = 'madurai';
60
61 select * from patients where patient_name like 'S%';
62
63 update patients set room_no=320 where patient_id=120;
64
65 select * from patients where patient_id=120;
66
67
68
69
70
71
72
73
```

The Results tab shows the following data:

patient_id	patient_name	age	city	disease	admission_date	room_no	doctor_id	
1	120	Swetha	68	Madurai	Diabetes	2026-07-24	320	2

The status bar at the bottom indicates "Query executed successfully." and "DEEPA\ (17.0 RTM) | DEEPA\deepa (70) | credo | 00:00:00 | Row 1 of 1".

#Delete discharged patients

The screenshot shows the SQL Developer interface with a query window titled "SQLQuery3.s...deeba (70)". The query is as follows:

```
68 update patients set discharge_status='discharged' where patient_id in(101,103,105,108,111,114,116,118,119);
69
70 update patients set discharge_status='Not discharged' where patient_id not in(101,103,105,108,111,114,116,118,119);
71
72 select * from patients;
73
74
75
76
77
78
79
```

The Results pane shows a table with 17 rows and 10 columns. The status of each patient is updated according to the query.
